CONTENTS TO VOLUME 25

Part 1 May 1966

The Malkus theory applied to magnetohydrodynamic turbulent channel flow. Jacques C. J. Nihoul *page* 1

The method of characteristics for the three-dimensional unsteady magnetofluid dynamics of a multi-component medium. Harry Sauerwein 17

Velocity spikes in separated flows. F. B. Hanson, S. H. Kozak and P. D. Richardson 43

Hypersonic strong-interaction similarity solutions for flow past a flat plate. William B. Bush 51

Experiments on turbulent-flow phenomena in eccentric annular ducts. V. K. Jonsson and E. M. Sparrow 65

Development of the boundary layer at a free surface from a uniform shear flow. Simon L. Goren 87

Results of an attempt to generate a homogeneous turbulent shear flow. W. G. Rose 97

On the damping of internal gravity waves in a continuously stratified ocean. Paul H. Leblond 121

The three-dimensional structure of the wake of a circular cylinder. J. H. Gerrard 143

Magneto-gasdynamic flow over a wedge. D. C. Pack and G. W. Swan 165

The shock-expansion method and Whitham's rule. Wilbert Lick 179

The shape of low-speed capillary jets of Newtonian liquids. Simon L. Goren and Stanislaw Wronski 185

Some remarks on 'Perturbation solutions in laminar boundary theory'. Herbert Fox and Shun Chen 199

Reviews

High Speed Aerodynamics and Jet Propulsion. Volume X: Aerodynamics of Turbines and Compressors 206

Mechanics of Incremental Deformations 208

Part 2 June 1966

Thermal convection with shear at high Rayleigh number. Andrew P. Ingersoll 209

The boundary layer in crossed-fields m.h.d. W. R. Sears 229

Internal waves of finite amplitude and permanent form. T. Brooke Benjamin 241

Numerical solutions of the Krook kinetic equation. Donald G. Anderson *page* 271

Aligned-field hydromagnetic flow past a slender body. S. Leibovich and G. S. S. Ludford 289

Velocity and temperature profiles in adverse pressure gradient turbulent boundary layers. A. E. Perry, J. B. Bell and P. N. Joubert 299

Calculations of the development of an undular bore. D. H. Peregrine 321

Note on the use of plaster of paris in flow visualization, and some geological applications. J. R. L. Allen 331

The entrainment function in turbulent boundary-layer and wall-jet calculations. M. P. Escudier and W. B. Nicoll 337

Submerged jets in short cylindrical flow vessels. K. J. McNaughton and C. G. Sinclair 367

The constraints imposed on tornado-like vortices by the top and bottom boundary conditions. J. S. Turner 377

The mechanics of the formation region of vortices behind bluff bodies. J. H. Gerrard 401

Reviews

Studies in Non-Linear Stability Theory 414

Research Inspired by the Dutch Windmills 415

Part 3 July 1966

An experiment on third-order resonant wave interactions. M. S. Longuet-Higgins and N. D. Smith 417

Measurements of third-order resonant wave interactions. L. F. McGoldrick, O. M. Phillips, N. E. Huang and T. H. Hodgson 437

On the theory of asymmetric shear flows past flat plates. Richard M. Mark 457

A second approximation for the velocity of a large gas bubble rising in an infinite liquid. R. Collins 469

Fluctuating lift and drag on a long cylinder of square cross-section in a smooth and in a turbulent stream. B. J. Vickery 481

Exploratory measurements in spiral turbulence. C. van Atta 495

Measured distortion of a laminar circular Couette flow by end effects. D. Coles and C. van Atta 513

Free gravitational oscillations in rotating rectangular basins. Desiraju B. Rao 523

Steady three-dimensional vortex flow. Robert Granger 557

On the entry problem for a compressible liquid. H. G. Pinsent 577

A note on slow vibrations in a viscous fluid. W. E. Williams *page* 589
Verification of the proposed equation for calculation of the forces on a sphere accelerating in a viscous fluid. Fuat Odar 591
Condensation of water vapour during supersonic expansion in nozzles. Philip G. Hill 593
Magnetohydrodynamic flows of non-equilibrium plasmas. Arthur Sherman 621

Reviews
The Non-linear Field Theories of Mechanics 638
Radiative Contributions to Energy and Momentum Transport in a Gas 640

Part 4 August 1966

Application of a magnetic mass spectrometer to ionization studies in impure shock-heated argon. B. Sturtevant 641
The use of a contraction to improve the isotropy of grid-generated turbulence. Geneviève Comte-Bellot and Stanley Corrsin 657
On transition in a separated laminar boundary layer. Peter Freymuth 683
On the formation of weak plane shock waves by impulsive motion of a piston. John P. Moran and S. F. Shen 705
Intermittency measurements in the turbulent boundary layer. H. Fiedler and M. R. Head 719
Stability of the laminar mixing of two parallel streams with respect to supersonic disturbances. M. Lessen, J. A. Fox and H. M. Zien 737
The collapse time of a closed cavity. John W. Miles 743
The field boundary of two line currents immersed in a streaming plasma. C. Sozou and G. Loizou 761
The effect of longitudinal viscosity on the flow at a nozzle throat. M. Sichel 769
Propulsion by oscillating sheets and tubes in a viscous fluid. J. E. Drummond 787
The directional spectrum of ocean waves: an experimental investigation of certain predictions of the Miles–Phillips theory of wave generation. A. W. R. Gilchrist 795
Shock-tube studies of vibrational relaxation in nitrous oxide. J. K. Bhangu 817
Influence of viscosity, surface tension, and inclination angle on motion of long bubbles in closed tubes. E. E. Zukoski 821

Reviews
Theory of Laminar Flow 838
Elements of Hypersonic Aerodynamics 844
